

# Ceramic Knives and Blades For Cutting Applications

*Advanced  
Ceramics for  
Progressive  
Industries*

**A leader in materials technology**

Pelletizing

Slitting

With a wealth of expertise and a material portfolio second to none, Saint Gobain Advanced Ceramics has the ability to meet the most demanding wear applications.

Ceramic industrial blades and knives are effective alternatives to stainless steel and tungsten carbide components where extreme wear and corrosion resistance is required.

Our high-quality zirconias, zirconia toughened aluminas, silicon nitrides, sialon and boron carbide, have proven to be ideal materials for providing great value to customers by extending component life.

- **Ultra-hard and wear resistant**
- **Low friction surfaces**
- **Ceramic resists galling and metal pick-up**
- **High impact, and thermal shock resistant**
- **Improved product quality from maintained surface finish & dimensions**
